

NAAWS Committee Policy 105 - Review and Consideration of New Materials, Products and/or Technology

PURPOSE

To facilitate the ongoing relevance and enhancement of the NAAWS Committee's publications and derivative works.

POLICY

To facilitate the ongoing enhancement of the NAAWS Committee's publications and derivative works, the NAAWS Committee encourages submission of new product and technology developments for inclusion in future editions.

The NAAWS Committee, at its sole discretion, may include new materials, products and/or technologies within future additions of standards publications and derivative works when submitted for consideration. Decisions of the NAAWS Committee will be provided by in writing and delivered by the NAAWS Committee Secretary.

Interested parties shall review the stipulations of consideration as detailed in the NAAWS Committee Form 105 (Review and Consideration), which can be found on the NAAWS Committee website at:
www.naaws-committee.com

Requests shall be in submitted in English, in a digital (pdf) format on a fully executed request form as referenced above and delivered to the NAAWS Committee Secretary in accordance with the instructions that may also be found on the NAAWS Committee website referenced above.

Requests will be placed on the NAAWS Committee's future meeting agenda and acted on during their normal course of business as time may allow. The NAAWS Committee is comprised of volunteers and the frequency of their meetings is dependent on current standards activities and their availability to meet.
